

# CENK KURTOĞLU

## FULL-STACK & CREATIVE FRONTEND DEVELOPER

cnkkurtoglu@gmail.com | İzmir, Türkiye  
github.com/cekuu35 | linkedin.com/in/cenk-kurtoglu

### PROFILE

Product-minded developer who ships complete web products, from interactive frontends and APIs to deployment and payment integrations. Strongest in TypeScript, Next.js and polished visual experiences.

### CORE STACK

TypeScript · JavaScript  
React · Next.js 15/16  
Tailwind CSS v4  
Node.js · REST APIs  
Firebase · SQL

### CREATIVE FRONTEND

Three.js · WebGL  
GSAP · Responsive UI  
Motion · Accessibility  
Performance-minded builds

### PRODUCT & CLOUD

Vercel · GitHub · CI/CD  
Webhooks · Payments  
Fal AI · OpenAI APIs  
n8n automation

### LANGUAGES

Turkish — Native  
English — Professional working proficiency

### EDUCATION

Associate Degree  
Computer Programming  
Manisa Celal Bayar University  
2022-2024

### AVAILABILITY

Remote contract / project work  
Türkiye · UTC+3

### SELECTED WORK

#### Nexus Studio — Cinematic 3D agency experience

Next.js · TypeScript · Three.js/WebGL · GSAP

- Built a live, immersive studio demo that turns premium art direction into an interactive browser experience.
- Owned the frontend implementation and productized it as reusable commercial source code.

[21-ultra-premium.vercel.app](#)

#### 20-template website library

Next.js 16 · TypeScript · Tailwind CSS v4 · App Router

- Created 20 multi-page starting points across SaaS, agency, hospitality, health, e-commerce and other client niches.
- Each template is responsive, customizable and validated with type-check and production build workflows.

#### llms.txt Generator — Public web automation

TypeScript · Crawling · Proxy/retry logic · Apify

- Built and published an Actor that crawls public websites and produces llms.txt and llms-full.txt outputs.

### EXPERIENCE

#### Founder & Full-Stack Developer — Renderivo

Remote, Türkiye · 2025–Present

- Designed and built an AI image/video SaaS using Next.js, TypeScript, Firebase Auth/Firestore and Vercel.
- Integrated 10+ generation models, secure webhook-driven credit fulfillment and multiple payment providers.
- Owned the responsive UI, authentication, data model, API orchestration, error states and production deployment.

#### Freelance Software & Automation Developer

Remote · 2025–Present

- Deliver C# automation utilities, data workflows and custom n8n automations from scoping through support.
- Translate business requirements into bounded deliverables, document handoff details and support post-delivery fixes.

### DELIVERY APPROACH

- Prototype complex visual direction in a live browser experience so stakeholders can react to the real interaction.
- Validate TypeScript projects with type-check and production builds, then review responsive behavior and accessibility.
- State scope and assumptions early, ship in reviewable increments and keep implementation decisions practical.
